

# Internet Access

## *Midland Networks can offer standard ADSL broadband, superfast fibre and more*

Fast speeds and quality technical support at affordable prices

### *ADSL*

Our standard ADSL connection comes at speeds up to 24Mbps. Our ADSL connections provide a static (or fixed) IP address as standard, with no internet filtering or disabling of services, allowing you to use your internet connection as your business requires.

### *VDSL (fibre)*

Fibre is rapidly becoming available in more areas of the UK. If fibre is available in your location, our fibre connections can offer superior upload and download speeds to ADSL, with greatly improved performance.

### *Unlimited Download*

All of our connections come with unlimited download available. This means you won't have to pay extra for using a high amount of data. This is perfect if your business uses the internet for more than just email and web browsing. We can help you decide whether unlimited download is right for your business.

### *Superfast Speeds*

Dependant on your location, our connections can provide superfast upload and download speeds perfect for downloading and transferring files, video conferencing, VoIP and more, with speeds right up to 80Mbps and beyond.
