

Wifi Networks

Wireless Network Installation & Support

With the option of no upfront costs, pricing starts at just £5.00 per month with flexible contract terms

Overview

For some time now, wireless networks have been a major part of business network infrastructure. At Midland Networks, we design and deploy a full range of wireless solutions. Whether you need a single wireless access point, or a 1000 user wireless cloud, we offer a range of services to suit your business and your budget.

External Wifi & Wireless Bridging of buildings

We can install and support external networks for both broad coverage such as in a school campus or building to building wireless links. We supply and support wireless networks up to 5km in range.

Voice over Wireless (VoWLAN).

Voice over wireless LAN (VoWLAN) is the use of a Wifi network according to the IEEE 802.11 standards for the purpose of voice calls. In essence, it is voice over IP (VoIP) but using the local Wifi Network to connect to the telephone system or VoIP provider

Guest Wifi

Guest Wifi is now a must have for hotels, hospitality venues and coffee shops. It is now fast becoming a necessity for all industries, as there is a growing expectation that all public areas and businesses provide guest wifi for public use, often for free. Midland Networks provide a business-grade wifi service built around the needs of your business and customers, with built in email capture, email and social media marketing, analytics and much more.
