

– THE DANGERS OF – TOLL FRAUD

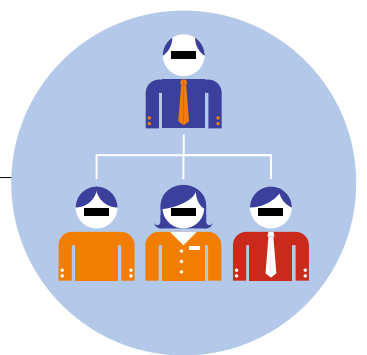

Did you know?

Global Phone Fraud costs are estimated at **£25.5bn** per year

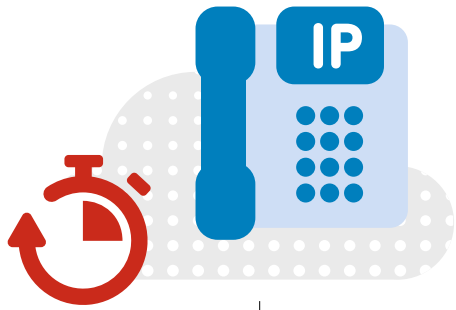

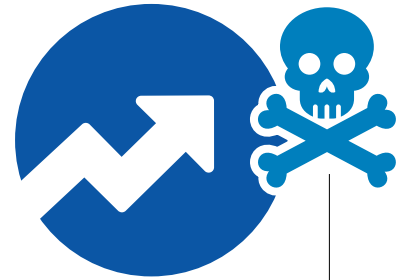

The United Kingdom is the third most targeted country in the world with **£1.2bn** costs for Toll Fraud alone

As a form of **organised crime**, as well as fraudsters, toll fraud can have links with drug dealers and even terrorists

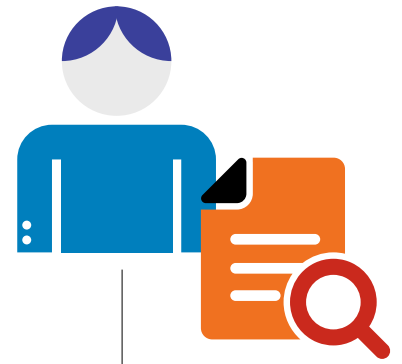

Statistics prove that an estimated **84%** of UK business are not safe from hacking

What's worse – it's on the rise with a **15% increase** per year

Regardless of whether you have analogue, digital or IP based system, fraudsters can hack in and gain access to your phone system **in seconds**

By the time a company discovers this, it's too late and the hacker has racked up potentially **tens of thousands of pounds** in fraudulent calls

An average cost to a victim of a UK attack is currently estimated at **£10k** and this may be undetected until the phone bill arrives!

What steps can a business take to **help prevent** Toll Fraud?

Install a Toll Fraud Application to your system. They needn't be expensive - NEC's SV9100 & SL1100 have built-in solution at just **£99**.
